

Benefits of an IYT Certification

IYT Worldwide is the trusted standard of excellence in yacht training, maritime certification and safety around the world. IYT has achieved the highest level of internationally recognized and sanctioned best practices (ISO 9001:2015) certification through the Government of Canada's "Canadian General Standards Board".

Today, IYT is the largest provider of crew and skipper certificates for the recreational yachting industry in the world. IYT has developed a modular format in maritime training to offer a series of recreational nautical courses that are accepted by major national registries and governments. IYT refers to this series of courses as the "International Boating & Sailing Passport."

This has enabled them to successfully establish a network of partner schools, offering IYT courses worldwide. Year after year IYT has been enthusiastically embraced by a growing number of schools, countries and administrations. IYT certificates are accepted by major yacht charter companies and many insurance companies offer discounted premiums to those who hold IYT qualifications. It is important to understand that an IYT certificate is a qualification that can be used globally. Unlike other training organisations, IYT insists on an understanding of IALA regulations in areas A & B, weather systems and tidal calculations in the north & southern hemispheres.

Why IYT:

- No other yacht certification authority is as international recognised
- No other yachting company offers such a diverse range of courses
- Every IYT (COC) course requires a practical on-the-water examination
- No other national yachting marine certification authority has a recognised ISO quality management system
- No other yachting organisation has been built by professional mariner
- No other yachting company offers high security certificates with QR code, hologram, photograph and signature strip
- No other yachting organisation offers its approved instructors & examiners the opportunity to work in 56 different countries
- IYT has been built on a "can do" attitude where nothing is too much trouble and every opportunity is explored
